

CERTIFICATE OF COMPLIANCE

Persistent Organic Pollutants (POP) Regulation

This statement summarizes Nexperia's position regarding obligations under the Stockholm Convention on Persistent Organic Pollutants and Regulation (EU) 2019/1021 on persistent organic pollutants for the covered articles defined below, as of the issue date of this document.

1. Scope

For purposes of this statement, "covered articles" means all articles supplied by Nexperia in original sale condition and placed on the market by Nexperia as part of a Nexperia-controlled released sales unit. Covered articles include:

- semiconductor products manufactured by or for Nexperia;
- non-semiconductor articles supplied as part of a Nexperia-controlled released sales unit, including third-party sourced accessories, peripherals, electromechanical items, interconnects, media, documentation carriers, and similar bundled items; and
- packaging materials supplied with such sales units.

For sales units containing multiple constituent articles, assessment under Regulation (EU) 2019/1021 is considered at the level of the relevant constituent article(s). Packaging is treated as separate article(s).

This statement does not apply to items not included in Nexperia's released product definition, including customer-added items, distributor-added items, substituted items, promotional inserts, or other uncontrolled additions made after Nexperia release.

2. POP obligations relevant to covered articles

Covered articles supplied by Nexperia are articles within the meaning of Article 2 of Regulation (EU) 2019/1021, which refers to the definition of "article" in Article 3(3) of REACH. Depending on the characteristics of the relevant covered article and the applicable legal trigger, obligations may include in particular:

- compliance with applicable prohibitions and restrictions for persistent organic pollutants in articles;
- compliance with applicable concentration limits under Regulation (EU) 2019/1021; and
- compliance with other applicable obligations relating to the placing on the market and treatment of persistent organic pollutants in articles.

3. Basis of statement

This statement is based on information available to Nexperia for covered articles, including supplier certifications, material composition declarations, internal specifications, released product definitions, and product configuration records.

On that basis, Nexperia confirms, to the best of its knowledge and belief, that the following statements apply to covered articles within the scope defined above:

- They do not contain any intentionally added substances listed in Annex A, B, or C of the Stockholm Convention on Persistent Organic Pollutants, including substances added or amended by decisions adopted at COP-12 in 2005 (chlorpyrifos, medium-chain chlorinated paraffins, and long-chain perfluorocarboxylic acids, their salts and related compounds).
- They do not contain substances in concentrations exceeding the applicable thresholds specified in Annexes I, III, or IV of Regulation (EU) 2019/1021 on persistent organic pollutants, as last amended by Commission Delegated Regulation (EU) 2026/1423 of 2026-06-30 as regards chlorpyrifos.

The presence of analytically detectable traces which may have been introduced via raw materials, auxiliaries, and additives cannot be excluded.

This certificate is based on information available to Nexperia, including supplier material declarations, supplier certifications, material composition data, internal specifications, released product definitions, and product configuration records, as applicable. Nexperia does not perform universal independent verification of all material content for every covered article or product. This certificate applies only to covered articles or products in their original sale condition, as supplied by Nexperia and included in Nexperia's released product definition. It does not apply to customer-manufactured products, end-use applications, downstream assemblies created outside Nexperia's released product definition, or uncontrolled additions or substitutions made after Nexperia release. This certificate is for informational purposes only and does not amend or supersede any existing agreement between the parties. Nexperia's standard terms and conditions of sale apply. For further information, please contact your usual Nexperia representative, reach out to the nearest [sales office](#), or submit a request via our [technical support form](#).

Sincerely,

Nexperia
